**R&D COMPANY PROJECTS PROGRAMME OF CDTI
- SUMMARY SHEET -**

R&D PROJECTS AID

INDUSTRY TECHNOLOGY DEVELOPMENT CENTER - CDTI

R&D projects developed by companies and aimed at the creation and significant improvement of production processes, products or services.

R&D projects are projects aimed at the creation and / or significant improvement of a production process, product or service that can include both industrial research and experimental development activities.

Open call throughout the year.

TYPES OF PROJECTS AND BENEFICIARIES

The beneficiaries of the projects are the **companies that subcontract to research organizations**.

Minimum eligible budget: **175,000 euros**

Duration: **12 to 36 months** for all projects except national technology cooperation projects (12-48 months)

There is no restriction regarding the sector or the technology to be developed.

Project modalities:

- Individual R&D projects: presented by a single company.
- National Cooperation R&D projects: presented by a consortium of a minimum of two and a maximum of six autonomous companies. They must sign a private collaboration agreement that governs the consortium.
- R&D Projects for International Technological Cooperation presented by Spanish companies participating in international technology cooperation programs managed by the CDTI:
 - EUREKA, IBEROEKA and PRIMA multilateral programs.
 - Bilateral programs established by CDTI with Institutions and Financing Agencies of other countries by virtue of bilateral agreements.
 - Program of international projects with certification and unilateral monitoring by CDTI.
- R&D projects for the development of dual technologies: related to the technological training of Spanish companies to tender in Defense and Security matters. These projects will have a complementary evaluation within the framework of the European and Spanish Defense and Security strategies. These projects will not be co-financed with ERDF funds
-
